| Maximum Marks |                 |

Project Overview:

Project Name: BookStore

Project Description: A fully responsive, MERN-stack web application designed for browsing a vast collection of books across genres, authors, and languages. Features include reading user reviews, receiving personalized recommendations, and a frictionless "buy or reserve" system.

Project Version: v1.0.0

Testing Period: [Start Date] to [End Date]

Testing Scope:

Features and Functionalities to be Tested:

1. Cross-platform responsive layout rendering (Desktop, Tablet, Smartphone).
2. Catalog filtering and discovery (by genre, author, and language).
3. Personalized recommendation feed rendering.
4. Review system (reading and submitting user reviews).
5. Direct transaction workflows ("Buy Now" processing).
6. Reservation system ("Reserve" book holding).

User Stories to be Tested:

- As a passionate reader, I want to filter books by language and genre so that I can easily discover titles matching my precise tastes.
- As a casual explorer, I want to look at community reviews and personalized recommendations so that I can confidently pick a book without decision fatigue.
- As a mobile user, I want to securely buy or reserve a book in just a few clicks while using my smartphone.

Testing Environment:

- URL/Location: <https://localhost:8000> (Development) / [<https://bookstore-production-app.com>](<https://bookstore-production-app.com>) (Staging)

- Credentials: Tester Accounts (Username: testuser@bookstore.com / Password: TestPassword123)

Test Cases:

| Test Case ID | Test Scenario                                             | Test Steps                                                                                                                                                                                                                | Expected Result                                                                                        | Actual Result               | Pass/Fail   |
|--------------|-----------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------|-----------------------------|-------------|
| TC-001       | Responsive Design Check (Crossdevice layout verification) | <ol style="list-style-type: none"> <li>1. Open the application URL on a smartphone browser.</li> <li>2. Observe the main catalog navigation layout.</li> <li>3. Check text readability and clickable elements.</li> </ol> | UI scales flawlessly to a mobile resolution layout without breaking components or hiding key elements. | [Record the actual outcome] | [Pass/Fail] |

|        |                                             |                                                                                                                                                                                                        |                                                                                                   |     |     |
|--------|---------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------|-----|-----|
| TC-002 | Positive Scenario:<br>Filter & Search books | <ol style="list-style-type: none"> <li>1. Navigate to the main books catalog.</li> <li>2. Select a specific filter (e.g., Genre: "Classics", Language: "English").</li> <li>3. Click apply.</li> </ol> | The system filters the catalog items rapidly, displaying only books matching the applied filters. | ... | ... |
|--------|---------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------|-----|-----|

|        |                                                                     |                                                                                                                                                                                                                   |                                                                                                                     |  |  |
|--------|---------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------|--|--|
| TC-003 | Negative Scenario: Missing mandatory fields during user book review | <p>1. Open any specific book item detail view.</p> <p>2. Scroll down to the interactive review submission form.</p> <p>3. Leave the numeric rating blank but fill out the text box.</p> <p>4. Click "Submit".</p> | Submission is blocked. System shows a visible validation alert requiring the missing information before submitting. |  |  |
|--------|---------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------|--|--|

|        |                                              |                                                                                                                                                                                                                        |                                                                                                                   |  |  |
|--------|----------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------|--|--|
| TC-004 | Positive Scenario: Complete book reservation | <ol style="list-style-type: none"> <li>1. Log into a registered tester profile.</li> <li>2. Open a book listing and select the "Reserve" choice.</li> <li>3. Confirm the selection within the modal window.</li> </ol> | The system creates an active hold record in the database, decreases available copies, and gives a success screen. |  |  |
|--------|----------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------|--|--|

|        |                                                     |                                                                                                                                                                                           |                                                                                                                          |  |  |
|--------|-----------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------|--|--|
| TC-005 | Boundary Scenario: Exceeding reservation allowances | <ol style="list-style-type: none"> <li>1. Select a book that has an available inventory stock count of exactly zero copies.</li> <li>2. Attempt to press the "Reserve" button.</li> </ol> | The action is disabled or the client throws a warning window stating the book cannot be held because it is out of stock. |  |  |
|--------|-----------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------|--|--|
