Data Flow Diagrams

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Flow (Textual Representation for BookStore):

1. The user logs into the BookStore application via a computer, tablet, or smartphone and configures their account.
2. The user inputs a search query (e.g., genre, author, or language) to browse the vast collection of books.
3. The React frontend sends the request to the Node.js/Express.js backend, which queries the MongoDB database.
4. The MongoDB database returns book details, user reviews, and personalized recommendations to the application.
5. The retrieved data is visualized in the UI, allowing the user to either buy or reserve their favorite books through a secure checkout process.

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Customer (Mobile user)	Registration	USN-1	As a user, I can register for the application by entering my email, password, and confirming my password.	I can access my account / dashboard	High	Sprint-1

		USN-2	As a user, I will receive confirmation email once I have registered for the application	I can receive confirmation email & click confirm	High	Sprint-1
		USN-3	As a user, I can register for the application through Facebook	I can register & access the dashboard with Facebook Login	Low	Sprint-2
		USN-4	As a user, I can register for the application through Gmail	I can register & access the dashboard with Google Login	Medium	Sprint-1
	Login	USN-5	As a user, I can log into the application by entering email & password	I can access the platform to browse books	High	Sprint-1
	Dashboard	USN-6	As a user, I can view personalized recommendations on my dashboard.	I see a list of books matching my taste upon logging in.	Medium	Sprint-2
Customer (Web user)	Book Search & Discovery	USN-7	As a user, I can browse books by genre, author, and language.	I can see a filtered list of books based on my search criteria.	High	Sprint-1
	Purchasing & Reservation	USN-8	As a user, I can buy my favorite books or reserve them.	I can successfully complete a secure checkout or add items to a reservation list.	High	Sprint-1
Customer Care Executive	Customer Support	USN-9	As an executive, I can view user order history to assist with purchase queries.	I can access order details and reservation	Medium	Sprint-2

				lists via the admin panel.		
Administrator	Inventory Management	USN-10	As an administrator, I can add new book releases or update existing catalog details.	The updated book information reflects immediately on the user dashboard.	High	Sprint-1
